

# A Balaclava Free Sewing Pattern

**Material: fleese**

How do it - fold the fabric so that the sides found each other with the entanglement of approximately 0.5 cm, and chop off so Topstitch seam "zigzag". Get a flat seam, reliable, and a little more comfortable, but it will be visible from the outside.

Remember: If sewing using a flat-stitch technique seam allowances are not needed. Otherwise if making a normal seam add a 5 mm seam allowance when cutting.

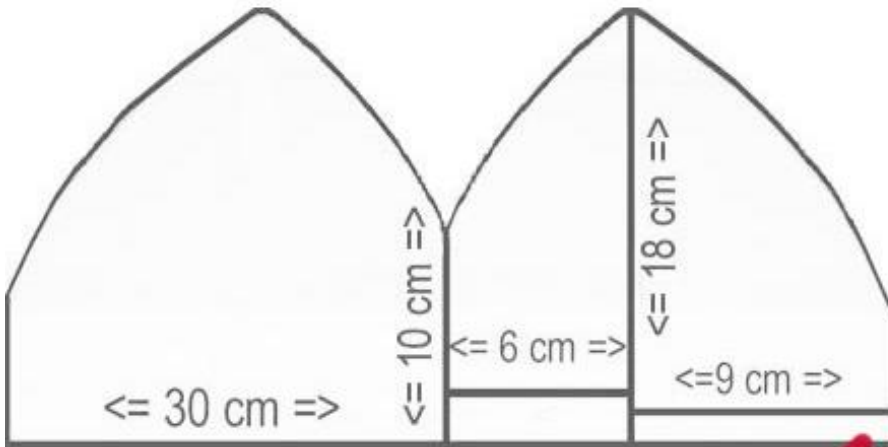

## **Lining (optional)**

If you have chosen to add a lining, follow these steps. Sew an identical hat from lining fabric .If you want a edge using stretch binding, turn the lining inside out and place inside the hat. Sew close to the edge with a long stitch (temporary) and go to step 5. If a finished seam is wanted, sew the hat and lining around the edge, right sides together leaving a 5cm gap. Pull the lining through this gap, and finish the 5 cm hole by hand or by top-stitching.
